

REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)

5181-92401

I hereby declare that:

Each inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 5,931,938, granted August 3, 1999 and for which a reissue patent is sought on the invention entitled MULTIPROCESSOR COMPUTER HAVING CONFIGURABLE HARDWARE SYSTEM DOMAINS

the specification of which

☐ is attached hereto.

☒ was filed on August 1, 2001 as reissue application number 09/920,433

and was amended on January 31, 2002, June 6, 2003, December 29, 2005, and August 31, 2009.
(If applicable)

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

☐ I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.

☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.

☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

The patentee did not claim all the patentee had a right to claim in the original patent. Claim 1 of the original patent recites "a computer controller responsive to said commands for specifying to said domain configurator which of said system units belong to each of said hardware domains." This limitation is believed to be overly narrow and unnecessary for patentability, and the absence of a broader claim drawn to subject matter similar to claim 1 represents at least one "error" in the original patent.
